Summary

An accomplished computer engineer with experience as a Research Assistant (RA), interested in multimodal learning and continual learning, skilled in maths and programming, and adept at communicating research results to the community, contributing to advancements in artificial intelligence research.

Work Experience

NepAI Applied Mathematics and Informatics Institute for research (NAAMII)

Research Assistant

Lalitpur, Nepal

April 2022 – Present

Supervisor: [Bishesh Khanal, Ph.D.](#)

- Developed skills for *object detection and segmentation* tasks on 2D medical images and explored their multi-modal approach (esp. *vision-language models*); also worked for segmentation with *3D mesh* data.
- Demonstrated *strong skills in writing scientific manuscripts*, with multiple papers submitted for review, showcasing the ability to *communicate methodologies, results, and implications* effectively.
- Ensured *reproducibility and modularity in ML projects* by implementing robust methodologies and practices, allowing for the transparent and replicable programming of the projects.

Sireto Technology

Blockchain Intern

Kathmandu, Nepal

August 2021 – December 2021

- Wrote *smart contracts in Haskell* language using the Plutus framework for the Cardano ecosystem.
- Improved *software development skills* by learning new tools and techniques that assist in completing the project.

Techniti Nepal

Co-founder

Lalitpur, Nepal

September 2020 – Present

- Co-founded Nepal-based company providing *software solutions* such as websites, electronic health record management systems, data visualization interfaces, and IoT-based solutions as well.
- Coordinated with clients* to understand their requirements and provided them with feasible and impactful solutions.
- Worked as a frontend developer with *ReactJS* and backend developer with *Django and FastAPI* for web applications.

Education

Bachelor in Computer Engineering

Pulchowk Campus, Institute of Engineering, Tribhuvan University

Bachelors

November 2017 – April 2022

- Ranked 11th* in the engineering entrance exam, competing with *15,000+ candidates*, received *full scholarship* for undergraduate study.
- Gained knowledge about *significant CS courses* like AI, Image Processing, Data Structure & Algorithm, DBMS, Software Engineering, and so on.
- Capstone Project*: Automatic speech recognition for *low-resourced Nepali language* which was later pushed for an IEEE conference under the supervision of [Prof. Subarna Shakya](#).

Publications

Vision-Language Model, NLP, Medical Imaging

Lead author / Presenter / Co-first author

2022-Present

- [Accepted for ASMUS workshop of MICCAI 2023] Adhikari, R., Dhakal, M., Thapaliya, S., Poudel, K., Bhandari, P., & Khanal, B. (2023). [Synthetic Boost: Leveraging Synthetic Data for Enhanced Vision-Language Segmentation in Echocardiography](#). arXiv preprint arXiv:2309.12829.
- Poudel, K., Dhakal, M., Bhandari, P., Adhikari, R., Thapaliya, S., & Khanal, B. (2023). [Exploring Transfer Learning in Medical Image Segmentation using Vision-Language Models](#). arXiv preprint arXiv:2308.07706.
- Dhakal, M., Chhetri, A., Gupta, A. K., Lamichhane, P., Pandey, S., & Shakya, S. (2022, July). [Automatic speech recognition for the Nepali language using CNN, bidirectional LSTM and ResNet](#). In *2022 International Conference on Inventive Computation Technologies (ICICT)* (pp. 515-521). IEEE.

Teaching

Community Eye, ENT & Rehabilitation Center (CEERS)

Lecturer

Bhaktapur, Nepal
June 2023 – Present

- *Training a group of interns* to develop medical imaging applications with the use of ML.
- Instructing and guiding them about ML through activities like *paper reading sessions, lecture-lab sessions, and topic presentations*.

4th Annual Nepal AI School (ANAIIS)

Lab Instructor

Kathmandu, Nepal
May 2023 – June 2023

- *Guided participants* through a series of labs related to *neural networks, transformers, federated learning, graph neural networks, active learning*, and so on.
- *Mentored three groups* during the 10-day *machine learning hackathon* (namely, Hack-a-Dev).

Software Fellowship, Locus 2021

Programming Instructor

Online
Summer 2021

- Provided tutoring on *software development life cycle* and assisted participants with *software documentation* and *library/framework installation*.
- Taught participants about *API development for web applications*, emphasizing its concepts, best practices, and usage.

Projects

Vision Language Segmentation Models (VLSMs) for Medical Images

Medical Imaging

February 2023 – June 2023

- Reported zero-shot and finetuned segmentation performance of *4 VLSMs* on *11 medical datasets* using *9 types of prompts* derived from *14 attributes*, prompts are given as text conditioning information.
- Worked with *encoder-decoder architecture* to generate binary segmentation masks for VLSMs.
- Tested the compatibility of the VLSMs (such as *CLIPSeg and CRIS*) pre-trained for open-domain images with medical images.

Object Detection in 2D Orthopantomogram (OPG) Images

Dental Imaging

September 2022 – Present

- Critically analyzed the *literature and state-of-the-art* models for different segmentation and detection tasks on radiology images of dentistry and their inadequacy.
- Designed and developed the *data annotation tool* for object detection over 2D OPG images.
- Working on identification and localization of dental *anatomical structures and abnormalities* while benchmarking with existing methods like *YOLO, RetinaNet, RCNN, and FastRCNN*.

Segmentation in 3D Teeth Scan

MICCAI Challenge 2022

Summer 2022

- Learned about the representation and preprocessing of *3D mesh and point cloud* data.
- Benchmarked with different 3D point cloud segmentation models such as *Pointnet++ and DeltaConv*.

[Open Source Project](#)

- Designed and trained *language model of Nepali (ie. Devnagari transcript)* for the text auto-complete system.
- Programmed the *pre-processing pipeline* to remove the non-Nepali characters from the dataset.

Super-Resolution with GAN (SRGAN)

May 2020 – August 2020

[Open Source Project](#)

- Implemented *open source model* of *SRGAN* with Keras/TensorFlow.
- Developed the *understanding of generator and discriminator* in GAN-based generative models.

Technical skills

Machine Learning	<i>Unimodal and multimodal (esp. vision-language model)</i> ML project structuring for detection and segmentation task while maintaining <i>reproducibility and modularity</i> ; integrating <i>open source models</i> for benchmarking. Proficiency in using libraries and frameworks like <i>NumPy, Pandas, PyTorch, and TensorFlow</i> .
Writing	<i>Knowledge synthesis</i> from the existing literature, <i>writing scientific documents and manuscripts</i> with <i>LaTeX</i> , and <i>communicating the results</i> to the community with transparency.
Web Development	Competence in creating well-documented backend applications with relational databases using frameworks like <i>Django, FastAPI, and NodeJS</i> . Adept at client-side programming with <i>ReactJS</i> .
Remote Server	Able to work with <i>remote Linux machines</i> for coding and project deployment using <i>SSH, shell script, tmux, Nginx, and Docker</i> .

Extracurricular Activities**DataRush (AI and Data Science Competition, Locus)**

Spring 2022

Co-ordinator

- *Call for sponsors*, maintained communication and coordination between sponsors, participants, mentors, and other organizers.
- Made the *budget planning*, prepared the *event's rule book*, planned the *event structure*, and ensure the smooth operations of the event.
- *Tested and validated* the machine learning models and their *solutions* submitted by the participants.

Achievements and Awards

Rank 11	Out of 15,000+ candidates, Full Scholarship for BEngg, funded by Govt. of Nepal
Winner	LogPoint CTF, Cybersecurity Competition
Finalist	Spirathon 2020, TechXperience Nepal

Certifications

Stanford University	Machine Learning
DeepLearning.AI	Deep Learning Specialization
DeepLearning.AI	AI for Medicine
DeepLearning.AI	Natural Language Processing
DeepLearning.AI	TensorFlow in Practice
University of Alberta	Reinforcement Learning
